FIRST ANNOUNCEMENT

Organize

HERVEX 2017
23rd edition

Period November 8-10, 2017
Venue Baile Govora, Valcea County, ROMANIA
Profile International Conference on Hydraulics, Pneumatics, Sealing Elements, Fine Mechanics, Tools, Specific Electronic Equipment & Mechatronics

Participants Manufacturers, dealers, users, researchers and designers of equipment and installations in the area of hydraulics, pneumatics and related fields, from Romania and abroad

Topics

- Fluid power in relation to electrical and mechanical drives
- Addressing the new industrial innovative concepts, in accordance with the requirements proposed by the European research and manufacturing
- Hydraulically and/or pneumatically driven machinery & equipment used in hydropower, transportation, oil, extractive industry, mining, agriculture and irrigation
- Hydraulics and the alternative (renewable) energy sources
- Control of energy consumption in hydraulic systems (control of hydraulic systems in order to optimize energy consumption of machines)
- Influence of working fluids on the environment
- Modern methods for optimizing hydraulic and pneumatic equipment and systems
- Development of Hydraulics and Pneumatics through national R&D and innovation programmes. The role of partnerships
- The role of professional associations in developing the field. The involvement of companies and FLUIDAS association in the training of specialists in the field
- The Academic Conference – the role of professional associations in guiding the higher education
